

Woodstock - 3rd June 1836.

Sir

I take the liberty to enclose a list of persons holding location tickets on grants for services - not so much in the hope that the difficulty in the shape of the non production of the certificates of settlement can be got over, as in the desire that the slightest chance of adding to the Constitutional list of electors may not be lost. - As one reason for my application that His Excellency may see fit to issue their Patents I may mention the fact of their all being actual settlers in the Country for more than three years and cultivating land privately obtained previous to their Grants -

Trusting you will excuse this trouble

I have the honor to be

your obed^t serv^t
